

Raising the Standards for Material Handling since 1979.

Summer days are here!

Days are longer, temperatures are warmer and moods are a little bit lighter.

We know that the heat isn't for everyone, so we have some products on page 2 that will help keep you cool when things get too hot. And page 4 has some information on heat stress; what it is, how to treat it and how to prevent it.

(Reminder: Father's Day is June 18th.
Fill those propane tanks and crank up the BBQ!)

In this issue:

Cooling Headbands - *various designs and colours available*

SEB120 \$3.80

SEI656 \$3.55

SEB139 \$3.80

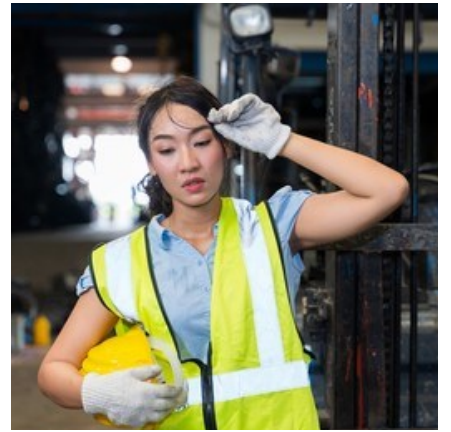

SEC684 \$7.95

Warmer days are coming which means that seasonal workers are busy at work! It's best to plan ahead to prevent heat induced medical issues, such as heat exhaustion and heat stroke.

Let's us help you with cooling products to keep you cool when things get hot!

SHOUT OUT TO...

Panels.ca

Years ago, the founder built this company with the belief in the importance of innovation and doing right by you, the customer. With over three decades of industry experience within the construction and framing industry, we have taken this foundation and are proud of the legacy that we have built. A legacy that is the culmination of years of experience completing precision-crafted work, in an efficient manner. In 2016 we made the decision to shift traditional construction practices to focus on the panelization of floor and wall assemblies. This was a major shift for our company but in an industry that is constantly shifting, there is no room for us to rest on our laurels.

Our team of architects, designers, and estimators will complete takeoffs and provide an accurate bid. Our design department inputs your plans and sends each component to the shop for cutting and assembly. While your grading and foundation crews are working, so are we. Our experienced framing crews, with state-of-the-art technology, assemble your precision built panels in a controlled environment.

Our products are constructed with the finest materials available. We use strict quality control measures to ensure superior strength, durability, and quality. After your panels are built, they are bundled, labelled, and delivered directly to your job site according to the production schedule, ready to be assembled. We provide exceptional quality, workmanship, supervision, quality-control foremen, and dependability while exercising all safety procedures. We also provide certified forklift and crane operators to manage our various equipment.

We go to Lift Line for many of our material handling needs. They have a good training program for our operators and provide rental trucks when ours are in their shop for repair.

Tim the Mechanic says,

“Manage Heat Stress at Work to Prevent Illness and Injury”.

Working when it's hot puts stress on your body's cooling system. When ignored, it can lead to heat-related illness, disability and even death. This can happen to anybody.

Heat stress can get worse when combined with physical work, loss of fluids, fatigue or a pre-existing medical condition.

Factors that can cause heat stress include:

- working in direct sunlight in the summer months
- humidity in the workplace (more than 50% relative humidity)
- working in certain workplaces such as foundries, smelters, chemical plants, bakeries, etc
- working with equipment that radiates heat

Visit the link below to learn about different types of heat stress, how to treat them and how you can prevent them.

44 years ago Lift Line Machinery Ltd. began with the following Customer Bill of Rights :

Our Customers Have the Right to Expect:

- timely service as viewed from their perspective;
- service at a reasonable expense;
- courtesy, respect and empathy regardless of the situation;
- us to listen so as to understand their problems;
- communicate clearly and concisely with them;
- us to fix it right the first time and provide zero defects;
- expect all of our people to be qualified;
- us to be dedicated to go the extra mile;
- personalized service that addresses their specific needs;
- cleanliness in whatever our service for them might be.

We have stuck to this Customer Bill of Rights every day since 1979!
