November...

The weather is getting colder, the days are getting shorter, and the world around us is getting ready for winter but we won't let that get us down.

As a Canadian company, we welcome these changes because we know that each season is necessary. Each one brings its own challenges, but we prefer to focus on the benefits. Winter reminds us to slow down and to pay attention to the things around us, to find beauty in the calm and to be grateful for the simple things.

November 11 is Remembrance Day. Support our Veterans and wear those poppies!

Make: Hyundai

Model: 30L-9A

Capacity: 5,500 lbs

Power: Propane

Mast: Triple

Tires: Solid pneumatic

Step by Step

If you have tall shelves/racks and have difficulty reaching the top, we may have the solution you are looking for...ladders!

We have access to ladders of all types: Narrow aisle, H Mobile Ladder Stand – With Handrails, Safe-guard Mobile Ladder Stand, Mobile Ladder Stand – No Handrails, Safety Angle Cantilever Ladders, Crossover Access Ladder and more.

The history of ladders

“Ladders have a long and storied history, dating back thousands of years. The first known ladders were made of wood and used for climbing trees. The ancient Egyptians also used ladders made of wood, which they used to enter the pyramids.

The Romans used ladders made of metal, which they called "scale." These ladders were often used in siege warfare to scale walls. In the Middle Ages, ladders made of rope were used by firefighters to climb to the top of burning buildings.

In the Industrial Revolution, ladders made of iron and steel became common, as they were needed for workers to access the upper floors of factories. Ladders are still essential in industry and manufacturing today, providing a safe way for workers to reach high areas.

Ladders are like the unsung heroes of industry and manufacturing. They may not be as sophisticated as cutting-edge technology or heavy-duty machinery, but they serve a crucial purpose that cannot be overlooked. From accessing high shelves to changing light bulbs, ladders are an essential tool in every workplace. Without them, many everyday tasks would become laborious and time-consuming.”

Customer service appreciate post!

One of our customers had some positive feedback regarding the service they received so we thought we'd give ourselves a pat on the back and share it.

“Thank you so much, Shelly and Doug! I received amazing feedback about how awesome you both are with your training. My clients were very happy, and one of them, who has some language barriers, felt especially grateful for how compassionate and empathetic you were. As an ESL person myself, I want to thank you even more, because I truly understand how that feels.”

Whether a customer walks in the door, calls or emails, our employees do their best to respond to inquires in a timely manner. We make every effort to meet your needs, and if the request is beyond our expertise, we try to recommend a local company that may be able to assist you.

47 years ago Lift Line Machinery Ltd. began with the following Customer Bill of Rights:

Our Customers Have the Right to Expect:

- timely service as viewed from their perspective;
- service at a reasonable expense;
- courtesy, respect and empathy regardless of the situation;
- us to listen so as to understand their problems;
- communicate clearly and concisely with them;
- us to fix it right the first time and provide zero defects;
- expect all of our people to be qualified;
- us to be dedicated to go the extra mile;
- personalized service that addresses their specific needs;
- cleanliness in whatever our service for them might be.

We have stuck to this Customer Bill of Rights every day since 1979!
