Lift Line Newsletter

October 2026

The greatest month by far

October is a month filled with change, family/friends and fun…what's not to love? Ok, I may be biased, but many wonderful things do happen within these 31 days.

The trees and temperature changes are cozy and comforting. Thanksgiving dinner is filled with all the yummy things one craves in the fall. And Halloween! Little painted faces and so much make believe!

Grateful to be present for all of it, and grateful for each and every one of you! Thank you for your ongoing commitment to our company's success.

Lift Line Machinery Ltd.

Benefits of a cushion-tired forklift:

- Tight turning radius
- Lower ground clearance
- Cost-effective maintenance
- Engineered specifically for smooth, indoor warehouse and manufacturing environments

For Sale

Make: Titan
Model: TCG25
Capacity: 5,000 lbs
Power: LPG
Mast: Triple
Tires: Cushion

Make: Caterpillar
Model: AC5000
Capacity: 5,000 lbs
Power: LPG
Mast: Triple
Tires: Cushion

Make: Unicarrier
Model: CF80
Capacity: 8,000 lbs
Power: LPG
Mast: Triple
Tires: Cushion

Trainer's Corner

"What Happens After the Lift Truck Training Is Over?"

Effective lift truck training is more than teaching an operator how to move a machine. It is designed to develop an understanding of the hazards associated with the equipment, the workplace, the load, and the people working around it. Training begins by establishing the operator's responsibility for controlling a moving hazard and understanding why safe operating practices are necessary. Relevant legislation, workplace procedures, manufacturer requirements, and fundamental operating principles are incorporated into the instruction so that operators understand both what they are expected to do and why it matters.

Retention is achieved by connecting the training to situations that operators are likely to encounter in their actual workplace. Rather than relying solely on memorization, the training uses discussion, examples, questions, demonstrations, and practical scenarios to encourage operators to recognize hazards and make appropriate decisions. Concepts such as pedestrian awareness, maintaining adequate clearance, load stability, visibility, travel direction, pre-use inspections, and controlling the truck are repeatedly reinforced throughout the course.

Practical evaluation then provides an opportunity for the operator to demonstrate that the information has been understood and can be applied safely. The evaluation should reflect the equipment, workplace conditions, loads, and tasks the operator is expected to perform. This helps identify areas where additional instruction, coaching, or familiarization may be required before the operator is considered competent to perform the work independently.

Finally, retention is strengthened when training becomes part of the workplace safety culture rather than a one-time event. Supervisors and employers reinforce the same safe operating principles through observation, coaching, inspections, refresher training when required, and correction of unsafe practices. When operators understand the reasons behind the rules and see those principles consistently applied in the workplace, the training is more likely to become part of their normal operating behaviour rather than simply information remembered for a test.

All Hands on Deck Food Drive

The food drive hosted by Giant FM at our location was a success!

We appreciate every person who stopped by to drop off a food or monetary donation. Your generosity helps so many people in our community; it really does take a village.

Shout out to Post Foods and Gordon Wright for the skid of cereal that was donated in memory of our mechanic, Tom.

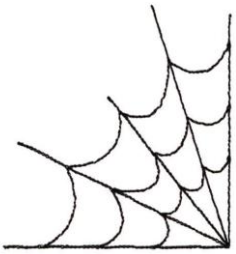
47 years ago, Lift Line Machinery Ltd. began with the following Customer Bill of Rights:

Our Customers Have the Right to Expect:

- timely service as viewed from their perspective;
- service at a reasonable expense;
- courtesy, respect and empathy regardless of the situation;
- us to listen so as to understand their problems;
- communicate clearly and concisely with them;
- us to fix it right the first time and provide zero defects;
- expect all of our people to be qualified;
- us to be dedicated to go the extra mile;
- personalized service that addresses their specific needs;
- cleanliness in whatever our service for them might be.



We have stuck to this Customer Bill of Rights every day since 1979!
